

Damla BİLGİÇ

AI/ML Developer & Data Scientist

✉ damlaazrabilgic@gmail.com ☎ +90 507 099 70 94 📍 Ankara, Türkiye 🌐 damlabilgic 🔄 damlablgc

AI/ML Developer and Data Scientist pursuing an MSc in AI & Robotics at Ankara University, currently working as an ML Engineer intern at FlyRank, an AI-driven SEO and content platform. Also a bursary researcher on NadirAI, an LLM-based expert system for rare-earth element rock identification, focused on LLM integration and pipeline development. Background in Biology and Management Information Systems, with hands-on experience in NLP pipelines, RAG, and full-stack AI applications using Python, TensorFlow/PyTorch, and React/TypeScript.

PROFESSIONAL EXPERIENCE

Machine Learning Engineering Intern <i>FlyRank</i> - Building a two-stage ML pipeline (classification → ranking) for content opportunity scoring, using Precision@50 as the defended evaluation metric. - Designed and deployed automation agents with n8n to support the internship workflow/pipeline. - Designed and built a personal portfolio website as part of the internship's AI Fluency track, including DNS configuration for a custom domain. - Working through a structured ML engineering capstone within a global, self-paced cohort program, covering research framing, ML task design, and pipeline development.	06/2026 – Present
Research Scholar / NadirAI BAP Project <i>Ankara University</i> - Building an LLM-powered expert system for rare earth element (REE)-bearing rock identification and characterization as part of a university BAP research grant. - Developing and evaluating NLP pipelines for domain-specific geological knowledge extraction using large language models.	05/2026 – Present Ankara
Data Science Intern <i>Ankara University Institute of Forensic Sciences</i> Processed and structured forensic datasets for statistical analysis (Excel, R); maintained reproducible data documentation workflows in a lab environment.	09/2024 – 06/2025 Ankara

EDUCATION

Artificial Intelligence & Robotics / Master's degree <i>Ankara University / Institute of Artificial Intelligence</i>	09/2025 – Present
Management Information Systems / Bachelor's degree <i>Istanbul University</i>	09/2025 – Present
Computer Programming / Associate Degree <i>Istanbul University</i>	09/2026 – Present
Biology / Bachelor's degree <i>Ankara University / Faculty of Science</i>	09/2019 – 01/2024

PROJECTS

Robot Behavior Explainer <i>SLM + Sonar</i> Designing an XAI system combining sonar sensor data with a SLM (Phi-3 Mini) to generate natural language explanations of robot decisions — deployed locally for data privacy, with a RAG-based architecture for domain-specific knowledge retrieval.	04/2026
Sales Data Analysis <i>SQL + Python</i> Designed and executed SQL queries to extract and aggregate sales data; built Python-based reporting pipeline with data visualization to surface business insights	02/2026

Skin Lesion Classification

09/2025

Deep Learning Project

Trained an EfficientNetB0 model for automated skin lesion diagnosis; resolved class imbalance via class weighting; achieved 92% melanoma recall (17/223 missed cases) using val_recall-based early stopping.

SKILLS

ML / AI

scikit-learn, TensorFlow, PyTorch, SLMs, Groq API, Explainable AI, NLP, RAG, MobileNetV2

Programming

Python, R, SQL, JavaScript, TypeScript

Web & Tools

React 18, Tailwind CSS, Framer Motion, Git, PyBullet, VSCode, Anaconda
